

The Commitment to Climate Program aims to connect private sector investors with low carbon projects and initiatives.

We do this by acting collaboratively to define best practices for corporate carbon offsetting.

The Program involves establishing a network of corporations interested in fostering low carbon initiatives through carbon offsetting and other climate finance instruments.

The Program is currently supported by **B3, Itaú Unibanco, Lojas Renner, Localiza, Mattos Filhos Advogados, MRV, Natura** and **RaiaDrogasil** and is constantly open for new members. As we expand, we fulfill our purpose of engaging the private sector in climate stewardship measures.

Key benefits for members

Credibility: project evaluation is carried out by independent professionals with extensive experience on ESG indicators and legal compliance.

Convenience: information is easily available on our Ekos Social Platform.

Cost reduction: Program costs are shared among members.

Higher Exposure for carbon offsetting initiatives.
